Teens, preteens copilot planes as Girls Aviation Program wraps up

Herald Journal

05/06/2019

4-H Cache Makers and the Utah State University Women in Aviation Society are teaching science, technology, engineering and math in aviation to young girls as part of a program to spark their interest in flying aircraft. At the end of the six-week program, the girls had the opportunity to copilot an airplane for 20 to 30 minutes while in the air.
